

# Smart Security SSL scanner

## Data Sheet

Smart Security SSL Certificate Discovery and Vulnerability Scanner supports your company to reduce the risk of disruption and security breaches.

### Key Benefits

- Fast scanning technology
- Virtual appliance
- SSL certificate discovery
- Host discovery
- No need to install software
- SSL vulnerability scanning
- FIPS 140-2 compliant
- NIST 800-171 compliant
- Management and technical reporting
- Cross Operating System
- No changes needed in current environment

## Product Overview

### Public and Private Key infrastructure

PKI provide the foundation of secure communication between assets. Losing track of certificates cause disruption in services and communication and can even cause data loss. In public and private key infrastructures, certificates are a critical component of digital trust which can cause serious damage if lost or broken.

### PKI is time consuming and complex

Certificate management in general can be complex and time consuming. Especially in IoT environments, large corporate networks and data warehouses. Smart Security Scan provides you a virtual solution to manage certificate validity and security.

### Plug and play solution

Smart Security SSL scanning solution is a 'plug-and-play' virtual appliance which can be made operational in under 5 minutes. Our SSL certificate scanner helps you keep track of 'lost' and 'forgotten' assets, certificates and identifies SSL vulnerabilities.

### No adjustments needed to your existing environment

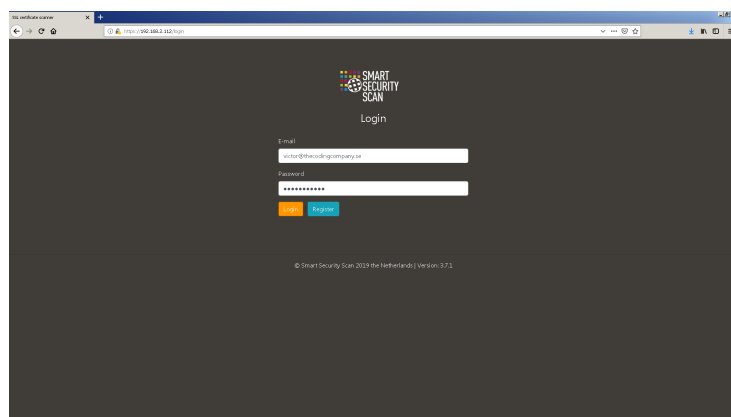

Other solutions sometimes require network and firewall changes or whitelisting. Our solution does not require any changes to your existing environment. We will manage!

## Specifications

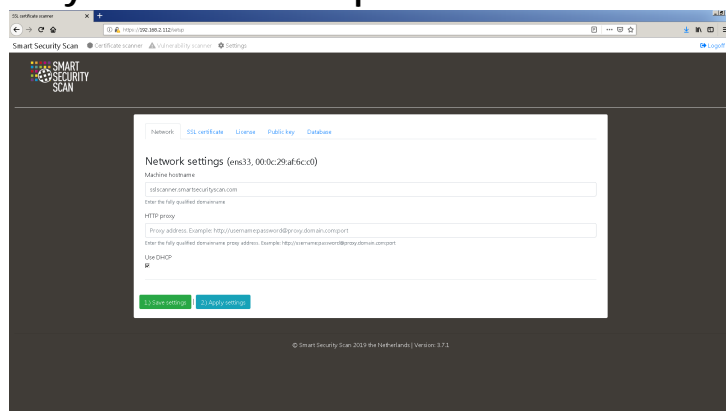

### VMware / VHD Virtual appliance

Processor	4 cores
Memory	8 gb
Hard Drive	40 gb
Operating System	Hardened Enterprise Linux OS
Database	MariaDB RDBMS
<b>System Requirements</b>	VMWare or VHD compliant virtual infrastructure

### Web based interface

### Easy web based setup

## About Svensk Coding Company AB

Smart Security Scan is a product of Svensk Coding Company AB. Global leader in providing security and systems management solutions to help consumers and organizations secure and manage their information-driven world. Our software and services protect against more security risks and enables confidence wherever information is used or stored.

## Features

- Virtual appliance
- Easy install and activation
- Host discovery
- SSL certificate discovery
- SSL vulnerability scanning
- SSL certificate analysis
- SSL certificate validation
- Web based UI
- VMware and VHD compatible
- FIPS 140-2 compliant
- NIST 800-171 compliant
- AES 256 XTS encrypted storage
- Hardened enterprise Linux OS
